12th in ranking

The Master's in Supply chain Management equips students with the knowledge and skills required to manage complex global supply chains, logistics operations, international transportation networks, and strategic transport infrastructure. The program prepares graduates for leadership roles in logistics, freight forwarding, supply chain planning, and the management of transport hubs, including ports and terminals.

Our teaching approach combines rigorous academic foundations with practical, real-world applications through business challenges, simulations, business games, and industry field visits. Students develop the ability to work collaboratively, make strategic decisions, and address the operational and organizational constraints that impact business performance. The program also provides valuable insight into the role of technology and emerging innovations in transforming the logistics and supply chain sector.

The International Logistics and Port Management program is designed to develop advanced knowledge and practical competencies in logistics management, international transportation, and port operations. Through an innovative learning approach that incorporates business case challenges, professional escape games, and digital simulations, students gain hands-on experience in solving complex logistics problems while balancing economic performance and environmental sustainability. Delivered in Dubai, home to one of the world's leading logistics hubs, the programme offers direct exposure to a dynamic global trade environment.

Examples of companies where our graduates work:
CMA-CGM, Maersk, MSC, Evergreen, Bolloré, CEVA Logistics, UPS, ADP, Airbus, Naval Group, DFDS, DP world, ADNOC.

Career Opportunities
